

ENCYCLOPILLIA

Preface

This preface is here to explain how this pdf is structured. You don't have to read it if you don't want to tbh, it's just to answer potential questions that may arise from some readers.

Use the index to find whatever info you are looking for. The pages are not numbered. All pills, charts, and meta are arranged in alphabetical order within their sections. Individual pill images are sub-categorized into sections based on the enlightened/unenlightened standard for its common usage. Pills which are of any other status or if are otherwise lacking a status are designated to the miscellaneous section. Pills in the miscellaneous section are ordered alphabetically based on their name and not the status of the pill. I.E. the "Miraculous Magneto Pill" is categorized as "Magneto Pill", and any special status of the pill is added in parentheses after the pill name in the index. Some pills may have "Enlightening" or "Enlightened?" status or otherwise something closely similar to "Enlightened" status, these are designated to the Enlightened section rather than the miscellaneous section.

In attempting to avoid any bias in the presentation of these pills I have placed all pills discovered and donated in the pdf regardless of affiliation or quality. You may also find "variants" of the pill you are looking at. These variants represent two different images of the same pill that have been discovered or donated. These are presented in the order of me obtaining them. No posts have been screen captured by me for this pdf.

Images too large to fit on the page may have been rotated, shrunk, or split between multiple pages in such a way so as to ensure readability of the content. Unfortunately if the image is split between many pages there is no way to capture the aesthetic the producer had in mind when the image was made. This is only an issue for charts in this edition. Also these images have been compressed so this pdf can be posted on most imageboards that would allow it.

That's all of the preface, the rest of the pdf should be relatively free of any serious discussion.
